#1 / Summer 2013 / Yellow

Emilia Izquierdo (Chile. Lives works London, UK)

Yellow, produced especially for FunctionLab, reflects on how appearances unveil themselves. Selecting yellows from species that display behaviors of aposematism (warning coloration) she explores the power of the body, attraction and repulsion. This theme runs throughout Emilia's work. Using source images that capture instants and unposed gestures she creates series that depict the relationship between bodies, seduction and power.

More information can be found on her website:
